

ENVIRONMENTAL POLICY STATEMENT

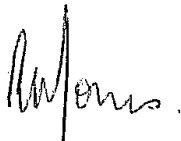

The Jones families have a rural background and, therefore, are very aware of the environment and the need to preserve it.

Our policy is based on the premise that protection of the environment, business development and growth can be compatible & sustainable. To this end we will strive to use common sense in regards to the environment and work within this parameter.

Our aim is to accept responsibility for our actions, thereby minimizing and managing our business impact on the environment.

Therefore, if we 'live this belief' we will:

- ***Understand and respect the environment;***
- ***Adhere to and develop environmental procedures and standards;***
- ***Communicate improvement suggestion, or identified risks, to management;***
- ***Ask about environmental requirements if working in an unfamiliar area or a new job;***
- ***Take responsibility to encourage staff and personnel to accept our environmental standards and guidelines and encourage them to develop strategies of their own;***
- ***Dispose of waste products in an environmentally sound manner and not contaminate or pollute the environment;***
- ***Ensure, if there is spillage of contaminants, e.g. diesel, oils etc to put immediate steps in place to clean up the spillage;***
- ***Encourage and congratulate good environmental practice in the workplace.***
